

Table 3e. Estimates of selection on female black coucal age (Z), including sexual (xZ), remaining (rZ), and total (sZ) selection following Henshaw et al. (2018). Sample size (n = 51).

Component	Parameter	β	(25% CrI)	(97% CrI)	P($\beta > 0$)
Quadratic (Z.q)	Selection on Z controlling for M	-1.21	-2.23	-0.19	0.010
Quadratic (Z.q)	Selection gradient on Z controlling for M	-0.10	-1.18	0.97	0.421
-	Simple Bateman gradient	1.13	0.86	1.39	0.999
-	Partial Bateman gradient	1.12	0.83	1.40	0.999
Combined	Sexual Selection	-0.01	-0.05	0.03	0.351
Combined	Remaining Selection	0.00	-0.02	0.02	0.528
Combined	Total Selection	-0.01	-0.05	0.03	0.361
