
a) Absolute values: female white browed coucals

Reproductive success N = 102 obs. of 83 ind. $R^2_m = 0.059$, $R^2_c = 0.463$

| Effect | β (95% Crl) | $P(\beta) > 0$ |
|---|-------------------|----------------|
| Intercept: females | 0.85 (0.39, 1.32) | 1.000 |
| Mating success | 0.59 (0.18, 1) | 0.998 |
| Random effect: observation level 102 groups | 0 (-0.79, 0.89) | 0.504 |
| Random effect: bird identity 83 groups | 0 (0, 0) | 0.000 |
