
Estimates of effects of number of nests and male categories in black coucals

Reproductive success N = 182 obs. of 179 ind.

Effect	β (95% CrI)	$P(\beta) > 0$
Intercept: males without ENO	0.4 (0.12, 0.67)	0.998
Number of nests: males without ENO	0.63 (0.41, 0.85)	0.999
Males with ENO	0.45 (-0.02, 0.92)	0.971
Number of nests: males with ENO	-0.33 (-0.58, -0.08)	0.004
